From Planning to Reality: Transforming San Diego into a Bicycle Haven

As cities look to increase mobility choices, biking will be an increasingly important component for both work and recreational trips. What can the San Diego area learn from San Francisco, Portland, Seattle and Long Beach in becoming a bike-friendly region? How is SANDAG planning for this form of transportation in the Regional Transportation Plan? With some of the best weather in the nation, how can the San Diego region transform itself into a bicycle haven? Find answers to these questions as local experts discuss the benefits and results of implementing bicycle master plans and lessons learned from other bike-friendly cities.

Speakers: **Ms. Min Zhou, P.E.**, is a Vice President/Principal Engineer for KOA Corporation. Ms. Zhou has 18 years of transportation engineering, planning and management experience in both private consultant companies and public agencies.

Mr. Seth Torma, AICP, is a senior transportation planner with 13 years of transportation planning/engineering experience.

Mr. Chris Kluth is an associate land use/transportation planner at SANDAG and is the project manager for pedestrian and bicycle planning projects.
